

Overview

The Programme in Investing was initiated with the intention of providing the basic theoretical and practical aspects of share trading in the capital market for existing and potential investors.

This programme will cover the basics of investing such as introduction to investing, functions of the stock market, benefits and risks involved in various capital market instruments, selecting a stock, Unit Trusts, securities regulation and ethics etc.

This programme suits for anyone interested in investing in the capital market or willing to enhance their knowledge on the capital market of Sri Lanka.

This is an eight week programme and lectures are held weekly only on Saturdays.
